

**CONDOMETT**

*Non Destructive Testing • Since 1953*

# ABOUT US

**Condomett** is specialized in the area of Non Destructive Testing and Heat Treatments, the first company in Italy able to offer this kind of services. Solidly present in the national territory, Condomett has two operating centers, Fidenza (PR) and Sarroch (CA) with a total workforce of 70 employees, 50 of which are qualified in the various methods and certified according to UNI EN ISO 9712 regulations.

Reliability, efficiency and incessant improving, together with experience gained over more than 60 years make of Condomett a benchmark in the national scene of Non Destructive Testing and Heat Treatments.

# NON-DESTRUCTIVE TESTING

With an experience gained over more than 60 years, qualified and certified staff for the several methods (VT-PT-MT-UT-RT-GW-ET-AT-TIR) and a range of constantly updated cutting-edge tools, Condomett is able to comply with any NTD branch, granting promptness and expertise.

We offer the following non-destructive tests:

- Visual testing (VT)
- Penetrant liquids inspection (PT)
- Magnetoscopic testing (MT)
- Radiographic testing (RX-RY-RDT)
- Ultrasonic testing (UT)
- Positive Material Identification (PMI)
- Guided waves (GW)
- Hardness test (HT)
- Acoustic emissions test (AT)
- IRIS
- EMAT
- Induced current test (ET-ECT-ECA-TECA-RFT-NFT-NFA-MFL-PEC)
- Termographic testing (TIR)
- Metallographic replica

# DRONE SERVICE

Condomett exclusively makes use of professional drones, produced in Italy and certified by ENAC, the Italian National Civil Aviation Authority.

All our technicians are qualified by ENAC as APR pilots able to operate in critical conditions.

We offer the following services:

- Visual inspections at altitude (chimneys, smokestacks, tank roofs, piping, etc.)
- Inspections of critical structures (bridges, pipelines, overpasses, dams, etc)
- Inspections of wind turbines and photovoltaic plants
- Photogrammetrical surveying and production of highly complex 3D models
- Thermographic measurements

Flexibility, prompt intervention, elimination of any risky situation, completeness in results and, not least, advantageous service are the reasons to opt for an aerial inspection or survey.

# HEAT TREATMENTS

Thanks to the experience gained over more than 50 years in the field of Heat Treatments, Condomett is able to understand and satisfy any client's single need, assembling furnaces of all dimensions, both at its plant and at client's location.

We can propose different solutions:

- Resistance heat treatments
- Induction heat treatments
- Hot air heat treatments

# WORKSHOP

In addition to NDT and heat treatment services, Condomett is offering a highly qualified workshop support for over 40 years, mainly in oil & gas, petrochemical, chemical, pharmaceutical and food industry.

In our 2500 m<sup>2</sup> plant located in Fidenza (PR) we can assemble and handle small and medium-sized metal structures and constructions.

Condomett is able to manufacture heavy metalwork and piping on clients' project thanks to the investments in cutting-edge specialized equipment made in recent years and to the expertise of our qualified personnel.

Furthermore, Condomett offers its Clients a Global Service that grants substantial advantages coming from the strict running costs control and from the improvement of quality and quantity for the provided services.
